A photograph of a man and a woman holding hands on a train platform. The man is on the left, wearing a grey and orange long-sleeved shirt and blue jeans. The woman is on the right, wearing a blue denim jacket over a pink top and blue jeans. Her hair is blowing in the wind. The background shows a green train car. The text 'UITP' is overlaid in the upper right, and the main title is in the center.

### Secure Public Transport in a Changeable World

#### Security and Safety

Security is a relatively new challenge in the context of public transport. Security addresses problems caused intentionally. This differs from safety which addresses problems caused accidentally.

The UITP Security Commission is made up of public transport security practitioners and offers support to UITP members on security matters. Its role is to collect and disseminate knowledge, experience and best practices on urban public transport security. It proposes UITP's positions and priorities on security vis-à-vis other stakeholders and partners.

#### Security Threats

Security problems, or threats, are caused by people whose actions aim to undermine or disrupt the public transport system and/or to harm passengers or staff. They range from daily operational security problems, such as disorder, vandalism and assault, to the terrorist threat.

#### Security is key to an attractive service

Any public transport operator has a responsibility for and a vested interest in protecting its customers, staff and assets, as well as the reputation of the network – passengers who feel insecure may choose not to use the system. It is well known that public transport is increasingly important for urban areas to prosper in the face of challenges such as reducing congestion and pollution, and coping with changing urban density and social inclusion. Security therefore plays an important role in helping public transport to become the mode of choice for today's citizens. Reaching excellence in security is

therefore a prerequisite for UITP's ambitions of doubling public transport market share by 2025<sup>1</sup>.

Investing in appropriate security measures can potentially bring economic benefits. On top of helping to increase ridership thanks to a more attractive service, money can be saved on costs such as repairs of vandalised assets. For example, the Hamburger Hochbahn invested in a surveillance system inside metro cars and noted nearly a 50% drop in graffiti and vandalism, which was costing millions every year in repairs<sup>2</sup>. Reassurance measures can also help to re-establish service after a major incident, reducing the financial impact.

In such an event, the operator can demonstrate that serious efforts have been made to protect passengers and staff. A positive image is key for the attractiveness of the system. In some circumstances, passengers can feel insecure, and this is sometimes reinforced by intensive media coverage of single events. However, this perception is often inconsistent with reality: you are ten times more likely to be involved in a fatal incident travelling by car than by public transport, whatever the cause of the incident<sup>3</sup>.

UITP Training Programme  
**Security Risk Assessment and Emergency Preparedness & Response**

7-9 December 2011,  
Brussels (Belgium)

- Chairman: Thomas Kritzer, Wiener Linien
- 35 PT operators: Europe, Canada, Abu Dhabi, Tehran, Singapore, Hong Kong, Tokyo, New York...
- Collaboration: CUTA, APTA, UIC, COLPOFER, European Commission...

# Introduction

Security in Public Transport  
has to face:

- Terrorism
- Daily crime

# Introduction: Terrorism

**In Russia(2009):**

**26 people killed  
100 injured  
in Nevski Express**

## Introduction: Daily crimes

**Daily crimes = Daily concerns**

Among them:

- Agresions
- Fraud
- Vandalism
- Graffitis
- Drugs
- Anti-social behaviour...
- ...

<sup>3</sup> Terrorism, Transit and Public Safety: Evaluating the Risks, Todd Litman, Victoria Transport Policy Institute, 2005

# Focus on the H Factor

# Report: Human factors reduce aggression and fare evasion, 2010 (bus)

- Questionnaire: 31 PT operators
- 2007: 1.9% bus drivers and 4% inspectors victims of aggression
- Increase of 19% aggression between passengers
- Decrease of 13% aggression against staff
- Aggression against staff occurs mostly late afternoon (surface transport), evening (underground)
- Mostly occurring inside the vehicle (64%)
- Aggression between passengers occurs mostly in the evening

# Train your staff!!!

# Make security integral to customer service

# Foster relationships with partners

- Law enforcement
- First responders
- Justice
- Passengers
- Schools/youth groups
- Media
- ...

# Wiener Linien – Help U

Presence &

Customer contact:

- Metro station „Karlsplatz“:  
concentration of drug addicted  
people, homeless people
- De-escalation between  
groups sharing station  
„Karlsplatz“, f.e.:
  - drug addicted people
  - passengers of WIENER LINIEN
  - owners of shops at the station

- Los Angeles County Metropolitan Transportation Authority and Justice Department:
- Pay fine OR inhouse community service

# Transport for London – Youth Engagement Team

## Community engagement

- target hot spots
- community participation in decoration
- engagement with youth

## Muni Transit Assistance Program

- employs local influential youths
- difuse tension
- discourage violence & vandalism
- encourage good beahviour

# Conclusions

Thank you for your attention.
